

Zoom Slider Extension

The Zoom Slider extension implements a zoom slider using CSS only (no JavaScript). While the image slowly zooms in, the text (title and description) scrolls on top of the image.

Zoom Slider can be used in responsive layouts (with breakpoints) or inside a layout grid for full width/flexible layouts.

Online demo:

<https://www.wysiwygwebbuilder.com/support/zoomslider.html>

Adding images

Click 'Add' to add a new image. To add multiple images at once, hold down the SHIFT-key on your keyboard while pressing the Add-button.

Each image can have a title and description.

Text Style

Specifies the style of the title and description, like font-family, font-size, color, padding and alignment. The overlay pattern adds a raster effect to the images.

Border

Specifies the width, color and radius of the slider's border.

Text Animation

The slider supports 3 types of animation for the text: fade, slide and scroll. Pause on hover, stops the animation when the mouse is on top of the slider.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 15 or higher
