

## Montage Pro

Montage Pro will automatically create a montage from a set of images with the option to fill all the gaps. This extension for WYSIWYG Web Builder extension is an improved version of the jQuery Montage extension.

Some of the improvements are:

- Built-in support for lightbox add-ons
- Title and descriptions, always visible or mouseover only.
- Links images to internal or external pages.
- Designed for use with layout grids or responsive layouts.
- 'Load more' functionality, only show a sub set and load images more on demand. This feature is also known as Infinite Scroll.
- Apply a filter to the thumbnail images (sepia, grayscale, blur, opacity)

Online demo:

### Adding images

Click 'Add' to add a new image. To add multiple images at once, hold down the SHIFT-key on your keyboard while pressing the Add-button.

The images can either be a local path or a URL.

**Spacing**

Specifies the space between images in pixels.

**Minimum width/height**

The minimum width and height that a picture should have.

**Maximum height**

The maximum height that a picture should have.

**Fill last row**

If enabled, there will be no gap in the end of the container. The last image will fill any white space left.

**Alternate the height value for every row**

Enable this option to alternate the height value for every row. The height will be a random value between 'min' and 'max'.

**Full Width**

Specifies whether to gallery is full width in layout grids. If set to false, the gallery will have a fixed width.

**Filter**

This option makes it possible to apply a filter to the thumbnail images. The filter will be removed when the mouse is hovered over the images.

The following filters are available:

- sepia
- grayscale
- blur
- opacity – light
- opacity - dark

**Lightbox**

The gallery also supports lightboxes so when you click an image then a lightbox slideshow will be launched. Most WWB lightbox add-ons are supported:  
<http://wysiwygwebbuilder.com/lightboxes.html>

To customize the behavior of the lightbox, you can add extra options through 'Options'. Please consult the documentation or website of the specific lightbox for more details about possible configuration options.

**Caption**

Specifies the styling of the caption. It's possible to display never, always or on hover. If the vertical alignment is set to 'middle', then the caption will cover the full image.

**Load More**

This feature is also known as "Infinite Scroll".

'Images per page' specifies how many images will be initially displayed.

The 'Load more' button can be used to load more images on demand.

To disable 'Load more' functionality, set 'Images per page' to 0.

***How to install this extension so it is available in WYSIWYG Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

***Requirements***

WYSIWYG Web Builder 15 or higher
