

## Split Slider Extension

The Split Slider extension implements a slideshow where one half is content and the other half an image. The content can include a title, description and 'Read more' button. This button can be linked to another page.

Split Slider can be used in responsive layouts (with breakpoints) or inside a layout grid for full width/flexible layouts.

Online demo:

<https://www.wysiwygwebbuilder.com/support/splitslider.html>

### Adding images

Click 'Add' to add a new image. To add multiple images at once, hold down the SHIFT-key on your keyboard while pressing the Add-button.

Each image can have a title, description, link and background color.

**Background Color**

Specifies the default background color of the content area. You can also give each slide a different background color. This color can be set in the properties of the slide.

**Text Color**

Specifies the text color.

**Opacity**

Specifies the opacity of the description text, so it has different contrast as the other text.

**Breakpoint**

Specifies the breakpoint at which the slider switches from horizontal to vertical mode for mobile layouts.

**Minimum Height**

Specifies the minimum height of the slider for vertical mode.

**Spacing**

Specifies the vertical spacing between text items.

**Border**

Specifies the width, color and radius of the slider's border.

**Text**

Specifies the styling of the text in the content area.

**Button**

Specifies the styling of the 'Read More' button. If you leave the Text field empty, then the button will not be displayed.

**Navigation**

Specifies the styling of the navigation buttons (next/previous).

**Animation**

The slider supports two types of animation: fade and slide. There are also 10 different types of easing.

***How to install this extension so it is available in WYSIWYG Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

***Requirements***

WYSIWYG Web Builder 15 or higher

***License Agreement***
